

**First and last name**

.....

**Question 1/30**

Elephantiasis in man is caused by?

- A. Dracunculus (guinea worm)
- B. Ancylostoma (Hook worm)
- C. Oxyris (pin worm)
- D. Wuchereria (filarial worm)

**Question 2/30**

A Scientist notable for genetics is

- A. C. Darwin
- B. G. Cuvier
- C. G. Mendel
- D. J. Goodall

**Question 3/30**

The first phylum with food segmentation system is

- A. Prorifera
- B. Cnidarians
- C. Rotiferas
- D. Annelids

**Question 4/30**

A protozoan parasite of chicken bird is ?

- A. Stentor
- B. Isospora
- C. Toxoplasma
- D. Eimeria

**Question 5/30**

The eye worm of man is ?

- A. Optical loa
- B. Loa loa
- C. Onchocerca
- D. Trichuris

**Question 6/30**

The 3 main classes according to their development are:

- A. Polychaeta,Hirudinea and oligochaeta
- B. Hirudinea, oligochaeta and polychaeta
- C. Polychaeta, oligochaeta and Hirudinea
- D. Oligochaeta, Hirudinea And polychaeta

### Question 7/30

Another name for ctenophora is ?

- A. Jellyfish
- B. Cnidarians
- C. Sponges
- D. Comb jellies

### Question 8/30

Among coelomates medusoid are absent in members of class?

- A. Anthozoa
- B. Scyphozoa
- C. Hydrozoa
- D. All of the above

### Question 9/30

The anticoagulant secreted by hirudo during feeding to prevent clotting is ?

- A. Hirudon
- B. Heparin
- C. Heamatin
- D. Hirudin

### Question 10/30

Planarians,liver fluke and taenia are all:

- A. Segmented
- B. Found in the gut
- C. Coelomates
- D. Flat worms

### Question 11/30

The study of marine mammals is?

- A. Malacology
- B. Cetology
- C. Marinology
- D. Hydro mammalogy

### Question 12/30

Nematocyst are the special cell found in?

- A. Cnidarians
- B. Annelids
- C. Rotifers
- D. Mollusc

### Question 13/30

Pig acquires the infection of taenia by ingestion of?

- A. Cysticercus
- B. Oncospherus
- C. Hexacanth
- D. None of the above

### Question 14/30

The body cavity found in ascaris is

- A. Enterocoel
- B. Pseudocoel
- C. Haemocoel
- D. Coelenteron

### Question 15/30

A Ciliophora with cilia around the peristome is

- A. Petritchia
- B. Holotrichia
- C. Suctoria
- D. Spirotrichia

### Question 16/30

Rotifera is divided into the following except

- A. Monogononta
- B. Bdelloidae
- C. Philodina
- D. Seisonidea

### Question 17/30

Most echinoderms have \_\_\_\_\_ number of arms

- A. Five
- B. Three
- C. Four
- D. Eight

### Question 18/30

Tunic is absent in \_\_\_\_\_

- A. Thalicea
- B. Ascidiacea
- C. Appendicularia
- D. Plurobanchia

### Question 19/30

Mollusc have the following except \_\_\_\_\_

- A. Mantle
- B. Arms
- C. Viscera mass
- D. Foot

### Question 20/30

Which is not a characteristic of mammals?

- A. 3 pairs of cranial nerves
- B. Internal fertilization
- C. Metanephric kidney
- D. Moveable eye lid

### Question 21/30

Class demospongiae is \_\_\_\_\_

- A. Glass sponges
- B. Ribbon sponges
- C. Fish net
- D. Bath sponge

### Question 22/30

Star fishes are \_\_\_\_\_

- A. Omnivorous
- B. Vegetarians
- C. Carnivorous
- D. Itchovorous

### Question 23/30

The tusk of elephant are

- A. Elongated canines
- B. Elongated molars
- C. Elongated incisors
- D. Elongated premolars

### Question 24/30

Symmetry of ctenophores is \_\_\_\_\_

- A. Biradial
- B. Bilaterally
- C. Assymetrical
- D. None of the above

### Question 25/30

The name arthropoda was established by \_\_\_\_\_ in \_\_\_\_\_

- A. Seibold, 1946
- B. Landmark, 1846
- C. Von seibold, 1845
- D. Aristotle, 1955

### Question 26/30

Rotiferas are pseudocoelomates .

They have ciliated crowns called?

- A. Euplectella
- B. Corona
- C. Pelicle
- D. Cillia-like flagella

### Question 27/30

Proglottids are found in the structure of \_\_\_\_\_ species

- A. Fasciola
- B. Taenia
- C. Schistosoma
- D. Dugesia

### Question 28/30

Wuchereria was discovered by Huxley

- A. True
- B. False

### Question 29/30

There are \_\_\_\_\_ known species of human

- A. Seventeen
- B. Twenty one
- C. Seven
- D. Nine

### Question 30/30

The study of birds is \_\_\_\_\_

- A. Ornithology
- B. Entomology
- C. Apology
- D. Endocrinology
